

DR. LEONARD M. HOCHSTEIN

MIAMI, FLORIDA

American Board of Plastic Surgery

WHAT MAKES YOUR PRACTICE DISTINCT?

The high standard of care we give makes us distinct. In addition to practicing effective treatments and the utmost in safety, our staff is warm, friendly, and there to ensure patients have a great experience.

1

WHAT IS YOUR APPROACH TO COSMETIC SURGERY?

I approach each patient with an understanding of what they are trying to achieve and then collaborate with the patient to come up with a plan of action to reach their goals. I never push my views on a patient because ultimately I am here to assist them by giving patients the results they want.

2

HOW DO YOU EARN PATIENTS' TRUST?

During the consultation, I analyze the patient's area of concern, and I point out things that I could correct and things that are impossible to correct so that they have a complete understanding of what's achievable. Then I let the patient make the final decisions about their procedure so there aren't any surprises.

BREASTS WITH BETTER SHAPE AND SYMMETRY

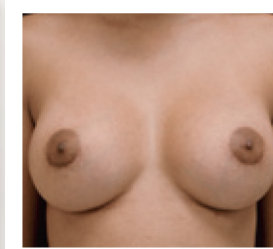

Well-known for breast augmentation procedures, which account for more than half of his practice, Dr. Hochstein looks at a procedure as more than just adding volume to the breast. "All women have some asymmetry comparing one breast to the other. A breast augmentation is an opportunity to add volume and improve symmetry," says Dr. Hochstein, a Black Diamond level provider of Allergan breast implants. Analyzing the overall shape of the breasts, Dr. Hochstein also performs internal breast shaping to improve results. "I try to get the sizes to match better by removing and shaping the breast tissue, which is key for an optimal result," he says.
